Building a Safer McDonough: Introducing Flock Safety Technology!

Hello Valued Citizens of McDonough,

Your safety is our top priority, and we're excited to share how the City of McDonough is investing in a safer future for everyone! Soon, we'll be installing Flock Safety technology—**smart cameras and detection devices designed to help our Police Department prevent crime and solve cases faster.**

What is Flock Safety?

These advanced systems include:

- **Cameras:** Known as "Falcons" and "Condors," these cameras help our police identify vehicles linked to crimes and provide broader surveillance in key areas.
- **Acoustic Detection Devices:** Called "Ravens," these can detect and alert police to sounds of gunshots.

Why are we doing this?

We've been listening to your concerns, and this is our commitment to addressing them and building a stronger, safer community. This initiative comes directly from our city's safety plans. It's about using modern tools to deter crime, enhance investigations, and make McDonough an even more secure place to live, work, and visit.

Will this affect your neighborhood?

If you are a citizen in the city limits of McDonough, you may be in an area where these devices are installed. Rest assured, these installations are designed to benefit the entire city by creating a more secure environment.
